ABSTRACT

Title: Career Satisfaction among Occupational Therapists in Bangladesh.

Aim

To identify the level of career satisfaction and its influencing factors among clinical Occupational Therapists in Bangladesh.

Objectives

1. To identify the level of career satisfaction among Occupational Therapists working in Bangladesh.
2. To identify the determinants of career satisfaction among Occupational Therapists.

Methodology

In this research study cross-sectional study design was used to conduct the study. Data was collected through mail and email to the participants. The response rates of the participants were 83.20 %.

Result

54.20% Occupational Therapists who are conducting their job as clinical settings are satisfied with their career. Other 39.20% are not satisfied with the profession. So overall 'Occupational Therapists of Bangladesh are satisfied with their career'.

Recommendation

More research is needed to explore the knowledge about Occupational Therapists in Bangladesh.

Conclusion

Occupational Therapy is a new profession in Bangladesh. There has limitation to serve the large group of people with disability as there has lack of Occupational Therapists in Bangladesh. It is a standard profession that spread all over the world, hope government will feel the need of Occupational Therapists to in reach the health care service of Bangladesh.

Key words: Occupational Therapy, Occupational Therapy in Bangladesh, career satisfaction, factors of career satisfaction.
